iv) **Details of the services being offered:**

The Portfolio Manager broadly offers services under the following categories:

Discretionary Services: Under these services the choice as well as the timing of the investment decisions rest solely with the Portfolio Manager. Thus the portfolio manager's decision taken in good faith in deployment of the Clients fund is absolute and final and cannot be called in question or open to review at anytime during the prevalence of the agreement or anytime thereafter.

Non-Discretionary services: Under this service Portfolio Manager manages the funds in accordance with the directions of the client.

Advisory Services: Under this Portfolio, Portfolio Manager advises the client about the various investments options keeping in view the investment profile of the client.

The client has an option to be on-boarded directly, without intermediation of persons engaged in distribution services

4. **Penalties, pending litigation or proceedings, findings of inspection or investigations for which action may have been taken or initiated by any regulatory authority.(For PMS Purposes)**

S.No.	Particulars	Remarks
4.1	All cases of penalties imposed by the Board or the directions issued by the Board under the Act or Rules or Regulations made there under.	Annexure-1
4.2	Penalties imposed for any economic offence and/ or for violation of any securities laws.	
4.3	Any pending material litigation/legal proceedings against the portfolio manager / key personnel with separate disclosure regarding pending criminal cases, if any.	
4.4	Any deficiency in the systems and operations of the portfolio manager observed by the Board or any regulatory agency.	
4.5	Any enquiry/ adjudication proceedings initiated by the Board against the portfolio manager or its directors, principal officer or employee or any person directly or indirectly connected with the portfolio manager or its directors, principal officer or employee, under the Act or Rules or Regulations made there under.	

5. Services Offered:

The Portfolio Manager currently offers following Services:

I Portfolio:

- A. **Globe Value:** Globe Value Portfolio aims at investing in blue chips with a smaller proportion in mid caps and small caps. The portfolio is designed with short to medium term perspective with moderate risk. The strategy would have active management and shall also use various derivatives concepts using future and options on the underlying/index with a view to optimize yield of the portfolio.
- B. **Globe Arbitrage:** Globe Arbitrage Portfolio primarily aims at generating high returns by exploiting market inefficiencies and other low risk opportunities by using various derivative strategies such as Cash Future Arbitrage, Covered Calls, Covered Puts, Index Arbitrage, Open Offer Arbitrage Opportunities in case of takeover, de-listing etc."
- C. **Globe Minerva India Undervalued:** Globe Minerva Funds aims at building a concentrated portfolio of limited stocks of our high conviction stock ideas. The strategy primarily aims at creating capital appreciation through investing in companies that are relative as well as absolute bargains. The selection would be made from the whole 'workable' universe of listed companies in BSE/NSE to diversify industry and market cap risk. It is most suitable for investors with a longer term horizon that seek to capitalize on value (ideally through definitely identifiable catalysts).
- D. **Globe Minerva India Underserved:** Our Underserved strategy screens companies that have, in our view, the largest real business upside within listed equities i.e. these companies lie within categories where consumption is at least a linear function of income. These companies, in our view, are once with the most sustainable business models. Many of the constituents under this strategy will be discretionary in nature and may exhibit cyclical nature like any other cyclical name. However, more often than prior cycles. This strategy is targeted at investors who are investing for longer term and seek to outperform broader markets over longer periods, when cash flow growth is a key determinant of outperformance.
- E. **Globe Dynamic:** The strategy endeavors to deliver returns by investing in fundamentally sound companies. Globe Dynamic invests in equities and equity derivatives of scrips across market capitalizations but largely in stocks constituting the CNX 200. The strategy invests with a short to medium term horizon and is suitable for clients seeking medium to high returns with moderate to high risk profile.
- F. **Globe Generational Wealth Creator (Globe-GWC):** Globe-GWC endeavors to build a portfolio of equity investments that would create sustainable wealth over a long period. The strategy invests with long term horizon and is aimed at investors seeking to build their investment portfolio with a view to create wealth.
- G. **Globe Economic and Business Cycle (Globe-EBC)** Globe –EBC aims to invest in a basket of stocks that are likely to benefit from the change in economic and business cycle. The Strategy focuses on selecting companies from across sector that would benefit from bottoming of business and economic cycle due to their fundamental strengths like operating leverage; financial leverage; cost advantage; location advantage; access to market, technology or products.
- H. **Globe Leaders in Economic cycles (Globe-LEC)** Globe LEC aims to invest in a basket of stocks that are likely to benefit from the change in Economic and business cycle with exposure in the sectors that is/are leading the cyclical economic or business recovery. The strategy relies on selecting companies that would potentially benefit most from bottoming of business and economic cycle due to their fundamental strengths.

- I. **Globe Trading the Market Cycle (Globe-TMC)** Globe TMC aims to actively take trading position in indices and frontline stocks based on technical analysis of the market cycle. The universe of stocks would predominantly comprise of fundamentally strong and liquid stocks preferably on which derivatives contracts are available. The nature of investment is entirely short term with the objective of trading gains.
- J. **Globe Activa:** Globe Activa is an actively managed, nimble strategy that uses variety of concepts to generate alpha returns. Apart from buy and hold, the strategy would adept to changes in economic and business cycle, exploit arbitrage opportunities and special situations. The strategy would make use of equity and index derivatives to augment returns. The selection of scrips would be a combination of quality large caps, midcaps and small caps. The strategy is suitable for clients having moderate to high risk profile, seeking medium to high returns.

II **Services – Advisory**

Globe PMS provides advisory to the investors to rebalance, reconstruct and protect the portfolio keeping in view the investment profile of the client.

Investment Philosophy and Methodology

- Globe Capital Market Limited aims at maximizing risk adjusted returns under its various PMS Services.
- It aims at making right investment decisions at appropriate time based on extensive research of various companies, industries and economy at large.
- It endeavors at formulating investment strategy considering current and expected market trends with due focus on risk diversification.
- Investment in all the Services will be only as per the SEBI regulations on PMS.
- The Portfolio Manager with the consent of the Client may lend the securities through an approved intermediary for interest.
- The Portfolio Manager will not invest any of the funds of the client in the shares, mutual funds, debt, deposits and other financial instruments of associates/ group companies of the Portfolio Manager.

Asset classes generally considered for deployment of Investment Amount

- Equity and equity related securities, convertible stock and preference shares of Indian Companies.
 - Debentures (Convertible and Non Convertible), Bonds and Secure Premium Notes, Swaps etc.
 - Derivatives both equity and fixed income as permitted under the regulations.
 - Options, Futures, Securitized Debt, tax exempt bonds of Indian Companies and Corporations.
 - Government Securities.
 - Units and other instruments of Mutual Funds.
 - Bank Deposit.
 - Treasury Bills, Commercial Papers, Certificates of Deposit and other similar money Market Instruments.
- "Schedule I" may be referred to for proper understanding of use of derivatives by the portfolio manager for its various Portfolio Management Services.

6. **Risk factors**

- Securities investments are subject to market risks and there is no assurance or guarantee that the objective of the investments will be achieved.
- Past performance of the portfolio manager does not indicate the future performance.
- The name of the Portfolio/Services does not indicate its prospects, performance and returns.
- Investments in the equity are subject to the performance of individual companies, changes in industry specific and overall economic factors.
- Investments in debt instruments and other fixed income securities are subject to interest rate risk, credit risk, liquidity risk, reinvestment risk etc.
- Higher/lower exposure to any particular sector or company may give rise to a risk of non-diversification. Diversified portfolios may be less volatile than non-diversified portfolio.
- In the case of stock lending risk relates to default from counter parties with regard to securities lent and benefits accruing thereon.
- Derivatives are highly leveraged instruments and their use requires high degree of skill, diligence and expertise. Small movement in the underlying security may have a large impact on the value of derivatives and futures and option. Some of the risks relate to mispricing on the improper valuation of derivatives and futures and options and inability to correlate the positions with underlying assets, rates and indices. Also, the derivatives and future and options market is nascent in India.
- PMS Transactions are done through Stock Broking Division of Globe Capital Market Limited.

- Past performance may or may not be sustained in the future
- Portfolio Performance is net of all fees & charges levied by the Portfolio Manager

10. **Audit Observations:**

11. **Nature of expenses:**

- **Investment management and advisory fees:** Professional fee charged in relation to Portfolio Management Services offered to clients. Management and advisory fees charged may be a fixed fee or a return based fee or a combination of both. The client in the manner provided in the Schedule for Portfolio Management Fees attached agrees to pay the Portfolio Management Fees to the Portfolio Manager at the rates and with the agreement.
- **Custodian fee/Depository fees:** The charges relating to opening and operation of dematerialized accounts, custody and transfer charges for share, bonds and units, dematerialization, dematerializations and other charges in connection with the opening and management of the depository accounts. Custodian fees will be charged at the rate as will be mutually decided by the parties in the client agreement.
- **Registrar and transfer agent fee:** Charges payable to registrars and transfer agents in connection with effecting transfer of securities, including stamp charges, cost of affidavits, notary charges, postage stamp and courier charges, etc.
- **Brokerage and transaction cost:** The investments under the Portfolio Management would be done through registered members of stock exchange who charge brokerage up to maximum of 2.5% of the contract value. Brokerage fees will be charged at the rate as will be mutually decided by the parties in the client agreement.

In addition to brokerage, transaction costs like network charges, turnover charges, stamp duty, turnover tax, securities transaction tax, or any other tax levied by statutory authorities, foreign transaction charges, if any and any other charges on purchase and sale of securities.

- i. **Service Tax:** As applicable from time to time
- ii. **Certification and Professional charges:** Charges payable for outsourced professional services like accounting, taxation and legal services, notarization etc. for certification, attestation required by bankers, intermediaries and regulatory authorities.
- iii. **Incidental charges:** Courier charges, stamp duty, service tax, postal stamps, charges relating to opening and operations of bank accounts.

12. **Taxation:**

Portfolio Manager and/ or Client shall comply with various provisions of Indian Income Tax Act, 1961 and other taxation laws as applicable, also taking into considerations various guidelines given in this regard in the detailed client agreement. Special reference needs to be made in respect of provisions related to capital gains, business income, interest, dividend income and all other provisions of the said act. Provisions related to Tax Deducted at Source (TDS) shall also apply, wherever applicable.

13. **Accounting Policies:**

The following Accounting Policies will be applied to the investments of the client:

- Investments in equity, Mutual funds and debt instruments will be valued at closing market prices of the exchanges (BSE or NSE as the case may be) or the Repurchase Net Asset Value declared for the relative Portfolio on the date of the report or any cut off date or the market value of the debt instrument at the cut off date. Alternatively, the last available prices on the exchange or the most recent NAV will be reckoned.
- Realized gains/ losses will be calculated while applying the FIFO and/ or weighted average principle. The Portfolio Manager and the client can adopt any specific norms or methodology for the valuation of investments or accounting the same as may be mutually agreed between them on a case-to-case basis.
- For derivatives and futures and options, unrealized gains and losses will be calculated by marking to market the open positions.
- Unrealized gains/ losses are the differences in between the current market values/ NAVs and the historical cost of the securities.
- Dividends on shares and units in mutual funds, interest etc. shall be accounted for on receipt basis. The interest on debt instruments shall be accounted for on accrual basis.

14. **Investors services**

i) **Details of the investor relation officer who shall attend to the investor queries and complaints for PMS:**

Name of the person	Mr. Gautam Gupta
Designation	Compliance Officer
Address	609, Ansal Bhawan, 16 KG Marg, Connaught Place, New Delhi – 110001
Email	Gautamgupta@globecapital.com
Telephone	011-30412345

ii) **Grievance redressal and dispute settlement mechanism:**

Grievance, if any, that may arise pursuant to the Portfolio Management Services Agreement entered into shall as far as possible be redressed through the administrative mechanism by the Portfolio Manager and are subject to SEBI (Portfolio Manager) Regulations 1993 and any amendments made thereto from time to time. However all the legal actions and proceedings are subject to the jurisdiction of Delhi courts or such other place as the Portfolio Manager thinks fit.

All disputes, differences, claims and questions whatsoever arising between the Client and the Portfolio Manager and/ or their respective representatives shall be settled in accordance with the provisions of the Arbitration and Conciliation Act, 1996 or any statutory requirement, modification or re-enactment thereof for the time being in force. Such arbitration proceedings shall be held at Delhi or such other place as the Portfolio Manager thinks fit.

Investor can lodge a complaint on <http://scores.gov.in> SCORES is a web based centralized grievance redressal system of SEBI. SCORES enables investors to lodge and follow up their complaints and track the status of redressal of such complaints online from the above website from anywhere. An investor, who is not familiar with SCORES or does not have access to SCORES, can lodge complaints in physical form at any of the offices of SEBI.

15. **Details of investments in the securities of related parties of the portfolio manager:**

16. **Details of the diversification policy of the portfolio manager:**

The Portfolio Manager invests in a well-diversified, sector agnostic portfolio of equity & other securities as permitted under the Securities Contract Regulation Act and Rules thereunder, including but not limited to Money Market instruments, Mutual Funds as per the discretion and decision of the Portfolio Manager.

Annexure 1

Name of the Entity / Person Against Whom Action Taken / Initiated by SEBI	Details / Description of the Action Taken / Initiated by SEBI	Corrective Steps Taken
1 Globe Capital Market Limited	Adjudication Proceeding was initiated against us as a Member NSE for Inspection. The Adjudication Officer had levied a monetary penalty of Rs. 2.25 lakhs vide order dated Oct. 18, 2004.	We appointed Concurrent Auditor to check maintenance of records and documents as statutorily required. We have also upgraded our back office software as part of risk management measures.
2 Globe Capital Market Limited	Enquiry proceedings, Adjudication proceedings and Proceeding u/s 11 & 11B of SEBI Act. 1992 were initiated against us as a broker in the matter of investigation into May 17, 2004. Schedule I
(Referred to Clause 5 of the Disclosure Document)

USE OF DERIVATIVES

SEBI in terms of Securities and Exchange Board of India (Portfolio Managers) Regulations, 2003, has permitted all the Portfolio Managers to invest in derivatives, including transactions for the purpose of hedging and portfolio rebalancing, provided leveraging of portfolio is not permitted in respect of trading in derivatives.

Accordingly, the Portfolio Manager may use derivatives instruments like Stock Index Futures, Options on Stocks and Stock Indices, Interest Rate Swaps, Forward Rate Agreements or other such derivative instruments as may be introduced from time to time, as permitted by SEBI.

The following information provides a basic idea as to the nature of the derivative instruments proposed to be used by the Portfolio Manager and the benefits and risks attached there with.

Illustrations on Use of derivatives:

A. Index Futures:

Benefits

- (a) Investment in Stock Index Futures can give exposure to the Index without directly buying the individual stocks. Appreciation in Index stocks can be effectively captured through investment in Stock Index Futures.
- (b) The Portfolio Manger can sell futures to hedge against market movements effectively without actually selling the stocks it holds.

Illustration:

Every portfolio has exposure to the market index. Hence the portfolio manager may choose to sell index futures, or buy index put options, in order to reduce the losses that would take place in the event that the market index drops.

For eg. A Rs.1 crore equity portfolio with an average beta of 1.1 can be hedged against Rs. 1.1 crore short position in index futures. Thus any fall in portfolio value on account on fall in market rates would be offset by gains in settlement of index futures.

B. Stock Futures:

Benefits

- a) Investment in stock futures can give exposure to the stock without directly buying the stocks. Appreciation in stocks can be effectively captured through investment in stock futures.
- b) The Portfolio Manager can sell stock futures to hedge against adverse movements effectively without actually selling the stocks in holds.

The risk and return payoff of the stock futures is similar to that of an index future as mentioned above.

C. Buying Options:

Benefits of buying a call option:

Buying a call option on a stock or index gives the owner the right; but not the obligation, to buy the underlying stock / index at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Illustration

For example, if the Portfolio Manager buys a one-month call option on Reliance Industries at a strike of Rs. 800, the current market price being say Rs. 820. The Portfolio Manager will have to pay a premium of say Rs. 25 to buy this call. If the stock price goes below Rs. 800 during the tenure of the call, the Portfolio Manger avoids the loss it would have incurred had it straightway bought the stock instead of the call option. The Portfolio Manager gives up the premium of Rs.25 that has to be paid in order to protect the Portfolio from this probable downside. If the stock goes above Rs. 800, it can exercise its right and own Reliance Industries at a cost price of Rs. 800, thereby participating in the upside of the stock for such a transaction, the breakeven price will be the sum of strike price and the premium paid, in this case it would be $\text{Rs. } 800 + \text{Rs } 25 = \text{Rs } 825$

Benefits of buying a put option

Buying a put option on a stock originally held by the buyer gives him / her right, but not the obligation, to sell the underlying stock at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Illustration

For example, if the portfolio manager owns Reliance Industries and also buys a three month put option on Reliance Industries at a strike of Rs. 820, the current market price being say Rs.830. The Portfolio Manager will have to pay a premium of say Rs. 15 to buy this put. If the stock price goes below Rs. 820 during the tenure of the put, the Portfolio Manager can still exercise the put and sell the stock at Rs. 820, avoiding therefore any downside on the stock below Rs. 820. The Portfolio Manger gives up the fixed premium of Rs. 15 that has to be paid in order to protect the Portfolio from this probable downside. If the stock goes above Rs. 820, say to Rs. 880, it will not exercise its option. The Portfolio Manager will participate in the upside of the stock, since it can now sell the stock at the prevailing market price of Rs.880.

D. Writing Options

Benefits of writing call option with underlying stock holding (Covered call writing)

Covered call writing is a strategy where a writer (say the Portfolio Manager) will hold a particular stock, and sell in the market a call option on the stock. Here the buyer of the call option now has the right to buy this stock from the writer (the Portfolio Manager) at a particular price, which is fixed by the contract (the strike price). The writer receives a premium for selling a call, but if the call option is exercised, he has to sell the underlying stock at the strike price. **This is advantageous if the strike price is the level at which the writer wants to exit his holding /book profits.** The writer effectively gains a fixed premium in exchange for the probable opportunity loss that comes from giving up any upside if the stock goes up beyond the strike price.

Illustration

Let us take for example Reliance Industries, where the Portfolio Manager holds stock, the current market price being Rs. 800. The Portfolio Manager holds the view that the stock should be sold when it reaches Rs.900. Currently the one-month Rs. 900 call option can be sold at say Rs.100. Selling this call gives the call owner the right to buy from the portfolio, Reliance Industries at Rs.900.

Now the Portfolio Manager by buying/ holding the stock and selling the call is effectively agreeing to sell Reliance Industries at Rs.900 when it crosses this price. So the Portfolio Manager is giving up any possible upside beyond Rs.900. However, the returns on the Portfolio are higher than what it would have got if it just held the stock and decided to sell it at Rs.900. This is because the Portfolio Manager by writing the covered call gets an additional Rs.100 per share of Reliance Industries. In case the price is below Rs.900 during the tenure of the call, then it will not be exercised and the Portfolio Manager will continue to hold the shares. Even in this case the returns are higher than if the Portfolio had just held the stock waiting to sell it at Rs.900.

Benefits of writing put options with adequate cash holding:

Writing put options with adequate cash holding is a strategy where the writer (say, the Portfolio Manager) will have an amount of cash and will sell put options on a stock. This will give the buyer of this put option the right to sell stock to the writer (the Portfolio Manager) at a pre-designated price (the strike price). This strategy gives the put writer a premium, but if the put is exercised, he has to buy the underlying stock at the designated strike price. In this case the writer will have to accept any downside if the stock goes below the exercise price. The writer effectively gains a fixed premium in exchange for giving up the opportunity to buy the stock at levels below the strike price. This is advantageous if the strike price is the level at which the writer wants to buy the stock.

Illustration

Let us take, for example, that the Portfolio Manager wants to buy Reliance Industries at Rs. 800, the current price being Rs.900. Currently the two-month 800 puts can be sold at say around Rs.100. Writing this put gives the put owner the right to sell to the portfolio manager, Reliance Industries at Rs.800. Now the Portfolio Manager by holding cash and selling the put is agreeing to buy Reliance Industries at Rs.800 when it goes below this price. The Portfolio Manager will take on itself any downside if the price goes below Rs.800. But the returns on the Portfolio are higher than what it would have got if it just waited till the price reached this level and bought the stock at Rs800, as per its original view. This is because the Portfolio Manager by writing the put gets an additional Rs.100 per share of Reliance Industries. In case the price stays above Rs.800 during the tenure of the put, then it will not be exercised and the Portfolio Manager will continue to hold cash. Even in this case the returns are higher than if the Portfolio had just held cash waiting to buy Reliance Industries at Rs800.

E. Cash Future Arbitrage:

The cash future arbitrage strategy can be employed when the prices of the future exceeds the price of the underlying stocks. Two simultaneous transactions are undertaken:-

- a) Buying the underlying stock
- b) Selling the futures

Consider an example of stock trading at Rs.100 while the near-month future is at Rs. 101.50. Additionally assume that the closing price of stock on expiry is Rs. 110. How will this fund work?

Transaction	Stock	Future	Difference
Initiation Arbitrage (Buy Stock – Sell Future)	100	101.50	1.50
Closing Arbitrage (Sell Stock – Buy Future)	110	110	0
Total Gain / Loss	10	-8.5	1.50

F. Index Arbitrage:

Here one buys futures on an Index and sells corresponding stock futures constituting the index or vice versa to take advantage of the price – difference or the spread between them.

Let's say current value of Nifty is 5950 and Nifty Futures is currently being traded at 5900 i.e at a discount of 50. However on the other hand cumulative value of all stock futures constituting Nifty is 6050 i.e at a premium of say Rs. 100. Thus an arbitrage opportunity arises in locking the above difference of Rs. 150, by buying Nifty Futures and selling corresponding Stock Futures.

G. Open Offer Arbitrage opportunities in case of Takeover, De-listing etc.

In open offer, the acquirer gives an offer to existing shareholders of the target company to acquire the shares at a certain price. The arbitrage opportunity arises when there is a significant price difference between the market price and the offer price.

The strategy is to buy the share in market and tender it in open offer. The returns would vary depending upon the number of shares accepted and the balance shares sold back in the market.

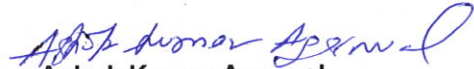

For Example in May, 2012, ABB the leading power & automation technology group, acquired ABB Ltd India at Rs. 900 per share in order to increase its stake in the company from approx 52% to 75%.The Market Price of ABB Ltd at that time was around Rs795. Thus an arbitrage opportunity arises by buying the stock in the market and tendering the same in the open offer thus realizing the difference between the offer price and market price based on the percentage of stock held by a person, accepted in the offer.

Let's take another example on Delisting where Essar Steel Holdings Limited had fixed the delisting price of Essar Steel Limited, determined by the reverse book building process at Rs. 48 per share. Market price of the concerned stock at that time was Rs. 45. Thus an arbitrage opportunity arises by buying the stock in the market and realizing the difference between the offer price and market price.
